COMMON TEST

Stanmorephysics.com
MARCH 2022

MARKS: 60

TIME: 1 hour

This question paper consists of 8 pages.

Downloaded from Stanmorephysics.com

INSTRUCTIONS AND INFORMATION

Read the following instructions carefully before answering the questions.

1. Answer ALL the questions.
2. Write ALL the answers in the ANSWER BOOK.
3. Start the answers to each question at the top of a NEW page.
4. Number the answers correctly according to the numbering system used in this question paper.
5. Present your answers according to the instructions of each question.
6. Do ALL drawings in pencil and label them in blue or black ink.
7. Draw diagrams, tables or flow charts only when asked to do so.
8. The diagrams in this question paper are NOT necessarily drawn to scale.
9. Do NOT use graph paper.
10. You may use a non-programmable calculator, protractor and a compass.
11. Write neatly and legibly.

SECTION A**QUESTION 1**

1.1 Various options are provided as possible answers to the following questions. Choose the correct answer and write only the letter (A to D) next to the question number (1.1.1 to 1.1.4) in your ANSWER BOOK, for example 1.1.4 D.

1.1.1 Which part of light microscope provide a source of light so that the object can be viewed?

- A Stage
- B Clip
- C Diaphragm
- D Mirror

1.1.2 Which of the following describes the behaviour of chromosomes during anaphase of mitosis?

- A Chromosomes align themselves along the equator of the cell
- B Each chromosome replicates and now has two chromatids
- C Chromatids of each chromosome separate and are pulled to opposite poles of the cell
- D Chromosome appear as a chromatin network

1.1.3 The organelles that synthesize proteins are called...

- A Ribosomes
- B Mitochondria
- C Chloroplast
- D Nucleoli

1.1.4 Which of the following is CORRECT about osmosis?

- A Solutes moves from region of high concentration to low concentration.
- B Particles moves from region of low concentration to high concentration.
- C Water moves from high concentration area to low concentration area.
- D Water moves from low concentration area to high concentration area.

(4x2) **8)**

Downloaded from Stanmorephysics.com

1.2 Give the correct **biological term** for each of the following descriptions. Write only the term next to the question number (1.2.1 to 1.2.4) in your ANSWER BOOK.

1.2.1 Fats that are liquid at room temperature

1.2.2 The structure that holds two chromatids together

1.2.3 Membrane that surrounds a plant vacuole

1.2.4 Process by which molecules move from a region of high concentration to a region of low concentration 4x1 (4)

1.3 Indicate whether each of the statements in COLUMN I applies to **A ONLY, B ONLY, BOTH A AND B** or **NONE** of the items in COLUMN II. Write **A only, B only, both A and B**, or **none** next to the question number (1.3.1 to 1.3.4) in the ANSWER BOOK.

COLUMN I		COLUMN II
1.3.1	Contains the pigment/s in a plant cell	A: Chromoplast B: Chloroplast
1.3.2	Monomers of proteins	A: Fatty acids B: Amino acids
1.3.3	Lack of this vitamin/s causes rickets	A: Vitamin A B: Vitamin B
1.3.4	A model used to explain how enzymes function	A: Fluid mosaic model B: Lock and key model

(4 x 2) (8)

TOTAL SECTION A: 20

SECTION B**QUESTION 2**

2.1 Study the diagram below showing a phase of mitosis.

- 2.1.1 Identify parts **B** and **C** respectively. (2)
- 2.1.2 State ONE function of part **A**. (1)
- 2.1.3 Identify the above diagram and give a reason for your answer. (2)
- 2.1.4 How many chromosomes were present at the beginning of this cell division? (1)
- 2.1.5 Write down ONE visible feature in the diagram that shows the phase of mitosis is taking place in an animal cell. (1)
- 2.1.6 Explain the significance of DNA replication during interphase. (2)
- (9)**

Downloaded from Stanmorephysics.com

- 2.2 An investigation was carried out to determine the effect of pH on enzyme activity,

The results of the investigation are shown in the table below

pH	Enzyme activity (%)
6.0	3
6.5	20
7.0	60
7.5	98
8.0	40
8.5	3
9.0	0

- 2.2.1 What is the optimum pH for functioning of this enzyme? (1)
- 2.2.2 Identify the:
(a) dependent variable
(b) independent variable (2)
- 2.2.3 Use the information provided on the table to draw a line graph to present the results of the investigation. (6)
- 2.2.4 List TWO ways in which the reliability of this investigation could be increased. (2)
- (11)
- TOTAL QUESTION 2 (20)**

QUESTION 3

3.1 Diagrams below show two types of cells.

- 3.1.1 Which structure (**X** or **Y**) represent plant cell? (1)
 - 3.1.2 Provide TWO visible reasons for your answer in QUESTION 3.1.1 (2)
 - 3.1.3 Name the type of nucleic acid found at A (1)
 - 3.1.4 Write ONLY the letter of the part that is the site for cellular respiration (1)
 - 3.1.5 Explain what will happen to the cell if part **B** becomes impermeable (4)
 - 3.1.6 Describe the events that will result in a cell if part **D** loses too much water (2)
- (11)**

Downloaded from Stanmorephysics.com

- 3.2 Study the micrograph of a cell organelle below. It was viewed under an eye piece of 10x and objective lenses of 40x.

- 3.2.1 Identify the above diagram. (1)
- 3.2.2 Calculate the total magnification of this micrograph. (2)
(3)
- 3.3 Proteins and carbohydrates are essential organic compounds in a human body need. A shortage on these compounds can cause serious illness.
- 3.3.1 Give TWO elements found in both proteins and carbohydrates. (2)
- 3.3.2 Describe the importance of proteins in a human body. (4)
(6)

TOTAL QUESTION 3 : (20)

MARCH 2022
COMMON TEST
MARKING GUIDELINE**

MARKS: 60

N.B This marking guideline consist of 7 pages.

Downloaded from Stanmorephysics.com

PRINCIPLES RELATED TO MARKING LIFE SCIENCES

1. **If more information than marks allocated is given**
Stop marking when maximum marks is reached and put a wavy line and 'max' in the right-hand margin.
2. **If, for example, three reasons are required and five are given**
Mark the first three irrespective of whether all or some are correct/incorrect.
3. **If whole process is given when only a part of it is required**
Read all and credit the relevant part.
4. **If comparisons are asked for but descriptions are given**
Accept if the differences/similarities are clear.
5. **If tabulation is required but paragraphs are given**
Candidates will lose marks for not tabulating.
6. **If diagrams are given with annotations when descriptions are required**
Candidates will lose marks.
7. **If flow charts are given instead of descriptions**
Candidates will lose marks.
8. **If sequence is muddled and links do not make sense**
Where sequence and links are correct, credit. Where sequence and links are incorrect, do not credit. If sequence and links become correct again, resume credit.
9. **Non-recognised abbreviations**
Accept if first defined in answer. If not defined, do not credit the unrecognised abbreviation but credit the rest of the answer if correct.
10. **Wrong numbering**
If answer fits into the correct sequence of questions but the wrong number is given, it is acceptable.
11. **If language used changes the intended meaning**
Do not accept.
12. **Spelling errors**
If recognisable, accept the answer, provided it does not mean something else in Life Sciences or if it is out of context.

Downloaded from Stanmorephysics.com

13. **If common names are given in terminology**
Accept, provided it was accepted at the national memo discussion meeting.
14. **If only the letter is asked for but only the name is given (and vice versa)**
15. **If units are not given in measurements**
Candidates will lose marks. Memorandum will allocate marks for units separately.
16. **Be sensitive to the sense of an answer, which may be stated in a different way.**
17. **Caption**
All illustrations (diagrams, graphs, tables, etc.) must have a caption.
18. **Code-switching of official languages (terms and concepts)**
A single word or two that appear(s) in any official language other than the learners' assessment language used to the greatest extent in his/her answers should be credited if it is correct. A marker that is proficient in the relevant official language should be consulted. This is applicable to all official languages.

SECTION A

QUESTION 1

- | | | | | |
|-----|-------|-------------------|-------|------------|
| 1.1 | 1.1.1 | D✓✓ | | |
| | 1.1.2 | C✓✓ | | |
| | 1.1.3 | A✓✓ | | |
| | 1.1.4 | C✓✓ | (2X4) | (8) |
| 1.2 | 1.2.1 | Unsaturated fats✓ | | |
| | 1.2.2 | Centromere✓ | | |
| | 1.2.3 | Tonoplast✓ | | |
| | 1.2.4 | Diffusion ✓ | (1x4) | (4) |

1.3 1.3.1 Both A and B ✓✓

1.3.2 B only ✓

1.3.3 None ✓✓

1.3.4 B ✓✓

Downloaded from Stanmorephysics.com

(2x4)

(8)

TOTAL SECTION A: 20

SECTION B

QUESTION 2

- 2.1 2.1.1 B – cell membrane ✓
C – chromosome ✓
Downloaded from Stanmorephysics.com (2)
- 2.1.2 Part A transport substances in and out of the cell ✓
It surrounds the contents of the nucleus ✓
(MARK FIRST ONE ONLY) (1)
- 2.1.3 Telophase* ✓, because:
Two daughter cells are present ✓
OR
Nucleolus reforms ✓
OR
Nuclear membrane reforms ✓ Any 1 (2)
***compulsory mark**
- 2.1.4 2 / two ✓ (1)
- 2.1.5 There is a cleavage furrow indicating the division of cytoplasm/ there is no cell plate dividing the cytoplasm ✓ (1)
(MARK FIRST ONE ONLY)
- 2.1.6 It doubles genetic material ✓
To ensure that there are two copies of genetic material to be shared between the two resulting daughter cells ✓ (2)
(9)
- 2.2 2.2.1 7,5 ✓
- 2.2.2 (a) Enzyme activity ✓ (1)
(b) pH ✓ (2)

Marking allocation of the graph

Criteria	Marks
Correct type of graph (T)	1
Caption (C)	1
Correct labels with units in both Y & X –axis (L)	1
Correct scale in both Y and X – axis,(S)	1
Correct plotting (P)	1: 1 – 5 points plotted correctly 2: all 7 points plotted correctly

(6)

2.2.4 Increase sample size✓
Repeat investigation✓
(MARK FIRST TWO ONLY)

(2)

(11)

TOTAL QUESTION 2 20

Downloaded from Stanmorephysics.com

QUESTION 3

- 3.1 3.1.1 X✓ (1)
- 3.1.2 large vacuoles present✓
has chloroplast✓
has cell wall✓
has regular shape ✓
(MARK FIRST TWO ONLY) (2)
- 3.1.3 Nucleic acids✓ (1)
- 3.1.4 C✓ (1)
- 3.1.5 Substances won't be able to go inside and outside of the cell✓
Waste substances will accumulate inside the cells✓
Resulting in a cell dying✓
Useful substances won't be able to enter the cell✓
Cause the shortage of useful substances inside the cell✓
Leading to a cell becoming inactive or dying✓ any 4 (4)
- 3.1.6 The cell contents will shrink✓
Pulling away the cell membrane from the cell wall✓
And that can lead to death of the cell / plant ✓ any 2 (2)
(11)
- 3.2 3.2.1 Mitochondrion✓ (1)
- 3.2.2 Total magnification = 10×40 ✓ = $400 \times$ ✓ (2)
(3)
- 3.3 3.3.1 Carbon✓
Hydrogen✓
Oxygen✓
(MARK FIRST TWO ONLY) (2)
- 3.3.2 Proteins act as an energy reserve✓
They are important in cell communication✓
Helps repair and build body tissues✓
Allows metabolic reactions to take place✓
Catalysis reactions✓ any (4x1) (4)
(6)
