COMMON TEST

JUNE 2016

**NATIONAL
SENIOR CERTIFICATE**

GRADE 10

MARKS: 50

TIME: 1 hour

This question paper consists of 6 pages, 1 Annexure and 1 Answer sheet.

INSTRUCTIONS AND INFORMATION

1. This question paper consists of **THREE** questions. Answer **ALL** the questions.
2. Use Annexure A to answer Question 1 and the ANSWER SHEET provided to draw the graph for QUESTION 1.1.5 (b).

Write your name and grade on the space provided on the ANSWER SHEET.

3. Number the answers correctly according to the numbering system used in this question paper.
4. Start **EACH** question on a **NEW** page.
5. You may use an approved calculator (non-programmable and non-graphical), unless stated otherwise.
6. Show **ALL** the calculations clearly.
7. Round **ALL** the final answers off to **TWO** decimal places, unless stated otherwise.
8. Indicate units of measurement, where applicable.
9. Write neatly and legibly.

QUESTION 1

- 1.1 Vaughn is a ABC bank customer. He received the new fee structure effective from 1 March 2016.

Use the fee structure Annexure A to answer the following questions.

- 1.1.1 Write down how much it will cost to withdraw R500 from a supermarket till point. (2)

- 1.1.2 Calculate the amount Vaughn paid for administration fees in 2015. (2)

- 1.1.3 Determine the percentage increase in fees for withdrawing money from ABC Bank ATM in 2016 compare to 2015. You may use the formula:

$$\text{Increase in fees} = \frac{\text{2015 fee} - \text{2016 fee}}{\text{2015 fee}} \times 100\% \quad (4)$$

- 1.1.4 State TWO valid reason why Vaughn may draw money from another bank's ATM when it cost more than using his own bank's ATM. (4)

- 1.1.5 Vaughn has to pay a fee to deposit money into his bank account.

- (a) Explain why the equation to deposit money into a bank account is:

$$\text{Cost (in rand)} = \frac{n}{100} \times 1,70 \quad (2)$$

- (b) Use the axis provided on ANSWER SHEET 1 to draw a graph to illustrate the cost of depositing money into a bank. (4)

- (c) Give one valid reason why it cost money to deposit money into a bank account. (2)

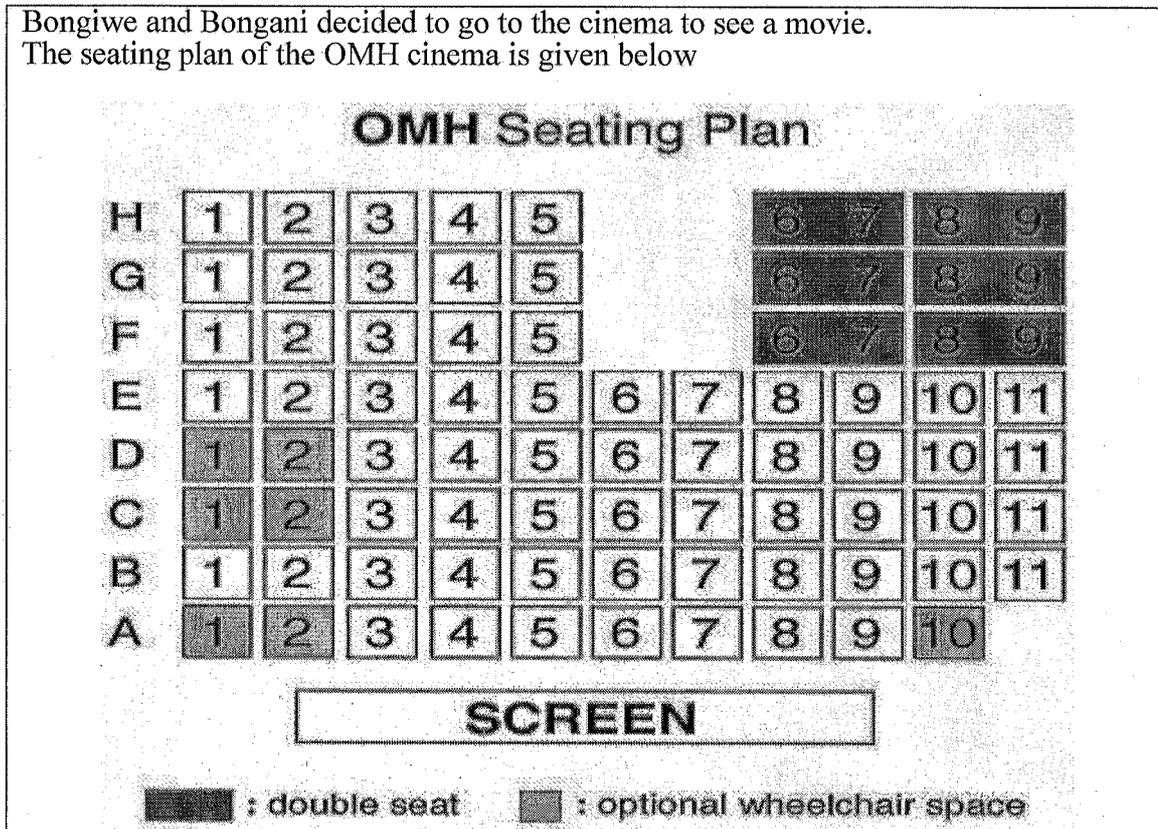

- () 1.2 Vaughn entered the bank at 11:54 and spent 39 minutes in the bank and then drove home. He arrived home at 13:30.
Calculate how long the journey home took. (4)

QUESTION 2

2.1

Bongiwe and Bongani decided to go to the cinema to see a movie. The seating plan of the OMH cinema is given below

Study the seating plan and answer the questions that follow.

2.1.1 Determine the maximum number of people that can be seated in the cinema. (2)

2.1.2 Write down the ratio
 number of wheel chair spaces : total number of seats, in the form
 1 :

(3)

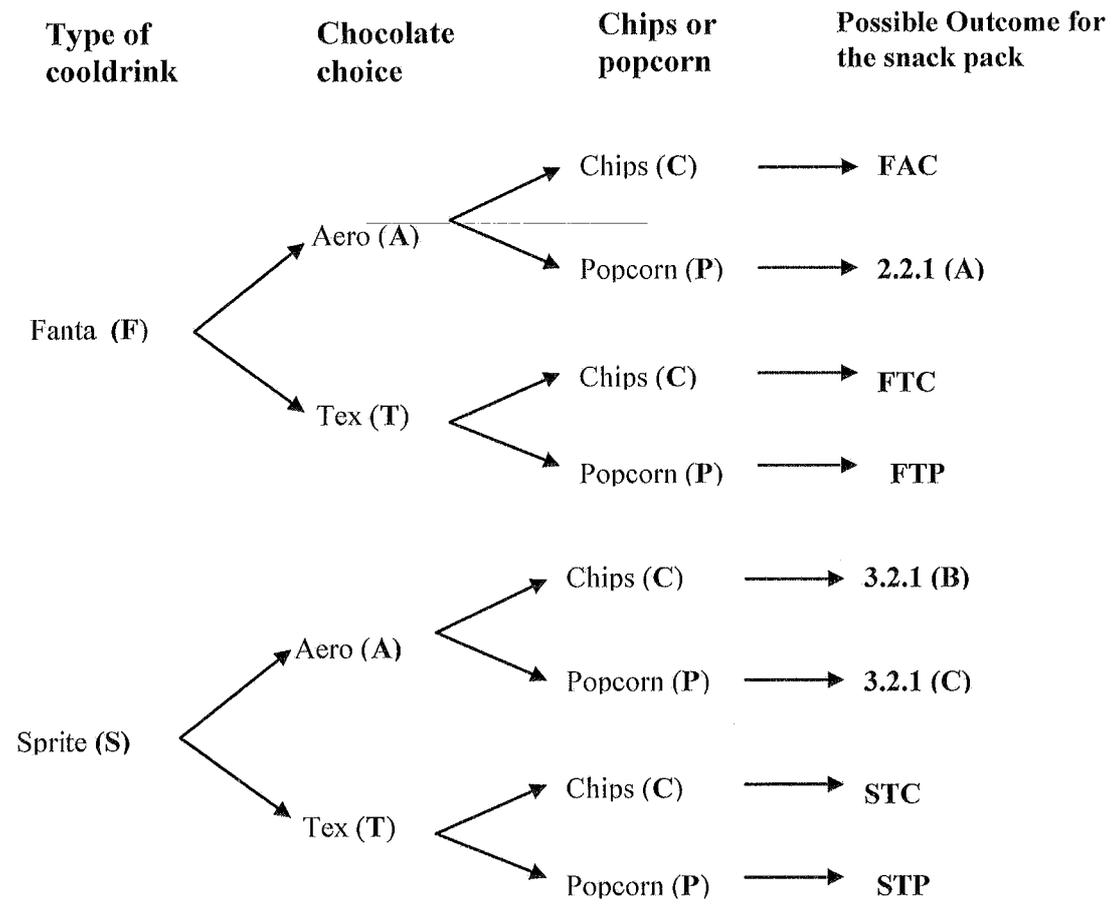

2.1.3 State one valid reason why there are double seats in the cinema. (2)

2.2

The cinema offers a combi snack pack consisting of a cooldrink, chocolate and either chips or popcorn.

The tree diagram below indicates the possible choices of the snack pack

TREE DIAGRAM: POSSIBLE CHOICE OF SNACK PACK

Study the tree diagram and answer the questions that follow:

- 2.2.1 Write down the possible outcome A, B and C. (3)
- 2.2.2 Determine the probability of selecting a snackpack with fanta as the cooldrink in a simplified form. (2)
- 2.2.3 Determine the probability of selecting this snackpack with coke as the cooldrink.. (2)

QUESTION 3

The gardener at a school decided to create a circular garden in the a rectangular grass patch in front of the office. The original dimensions of the grass patch was:

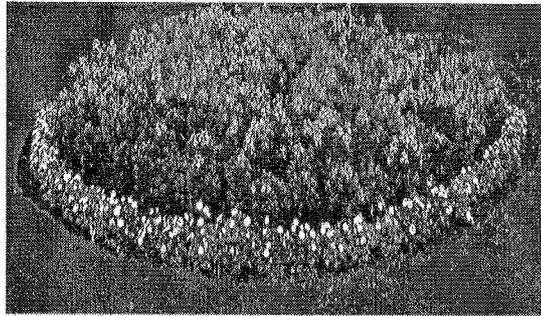

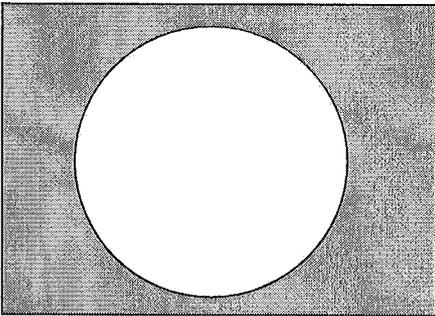

- Length = 20 m and
- Breadth = 15 m

The length of the diameter of the flower garden is 12 m.

He intended growing a hedge of flowers on the circumference of the garden.

Sketch of the garden:

Picture of a circular garden

3.1 Calculate the circumference of the garden .

You may use the following formula:

Circumference of a circle = $2 \times \pi \times \text{radius}$ using $\pi = 3,142$. (4)

3.2 Calculate the area (in m^2) of the circular garden.

Use the formula: **Area of circle = $\pi \times (\text{radius})^2$** using $\pi = 3,142$. (3)

3.3 Calculate the area of the remain grass on the field.
Round off your answer to one decimal place.

Use the formula: **Area of a rectangle = length \times breadth**

GRADE 10

MARKS: 50

Codes	Explanation
M	Method
MA	Method with Accuracy
CA	Consistent Accuracy
A	Accuracy
C	Conversion
J	Justification/Reason/Explain
SF	Substitution into a given formula
S	Simplification
RD	Reading from a table OR a graph OR a diagram OR a map OR a plan
O	Opinion
P	Penalty, e.g. for no units, incorrect rounding off, etc.
R	Rounding Off
NP	No penalty for rounding OR omitting units

This memorandum consists of 6 pages.
